<head>

    <title> Register form </title>

</head>

<body>

<form>

    <table>

      <tr>

        <td>

            Name :
```

```html
        </td>

        <td>

            <input type="text" name="">

        </td>

    </tr>

    <tr>

        <td>

            Qualification :

        </td>

        <td>

            <select>

                <option>BE</option>

                <option>B.TECH</option>

                <option>BSC</option>

                <option>BCA</option>

                <option>Other</option>

            </select>

        </td>

    </tr>

    <tr>

        <td>

            Age :

        </td>
```
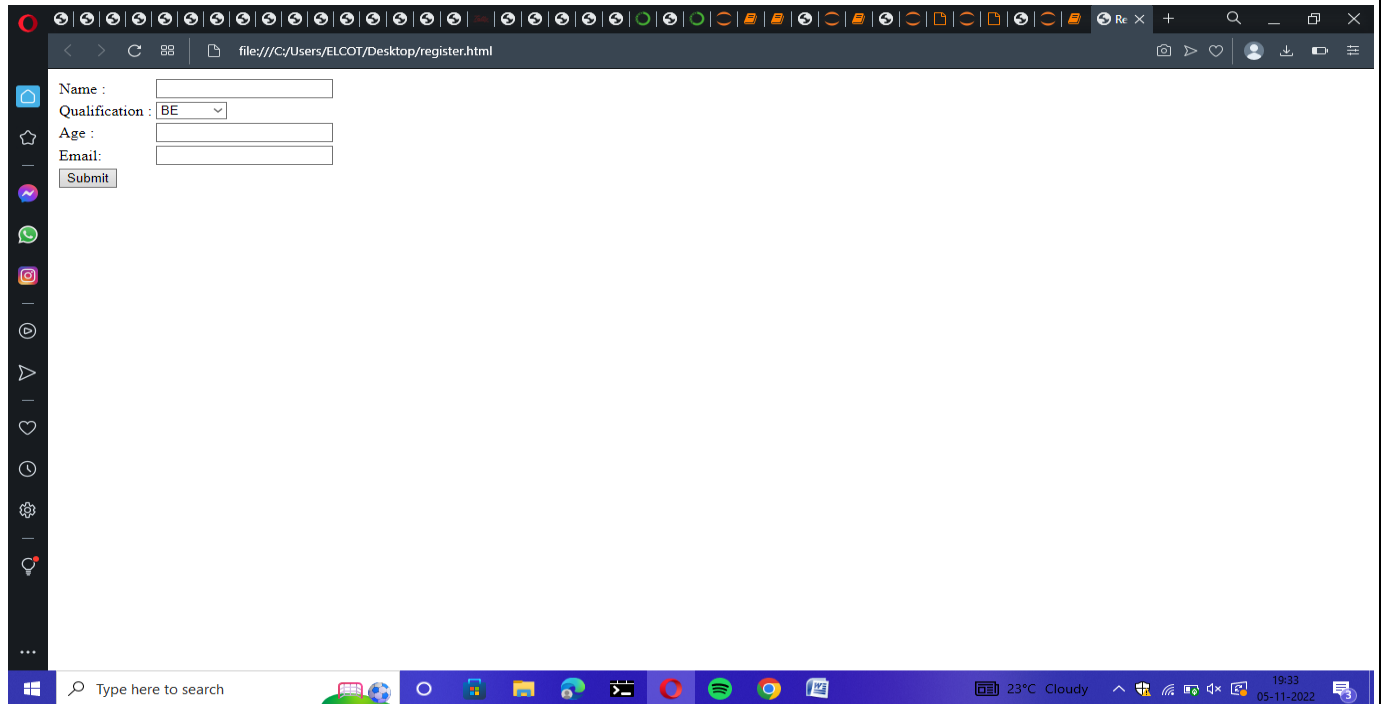

```html
        <td>
         <input type="text" name="">
         </td>
      </tr>
        <tr>
         <td>
            Email:
         </td>
         <td>
           <input type="mail" name="">
          </td>
      </tr>
         <td>
           <input type="Submit" value="Submit" name="">
          </td>
      </tr>
    </table>
</form>
</body>
</html>
```
